

Moore County Wildlife Conservation Club

Range 1 Workday

Saturday May 11th at 9am

We are about to bring in a large amount of fill dirt to reopen Range 1. To do this some preparatory work needs to be completed. We will need an army of weed whackers and hedge trimmers for this work day. The more folks we have the faster and more we can complete. All the items listed below need to be completed before the fill dirt can be delivered.

What we need to complete before the fill dirt can arrive:

- Clear the rear impact berm of vegetation (so that the heavy equipment operators can see the berms/edges clearly)
- Clear at least 15 yards of the side berms starting from the back berm and heading up range.
- Disassemble the mobile tables on this range and stack the recovered wood under the range 5 cover.
- Remove all trash and other items from the range and stack it beside the green shed between the shed and range 4. Dumpster all trash/unusable items.
- Remove the target stands along the side berms and store them in the green shed. These are square metal boxes that a 2x4 is inserted into, with two pieces of rebar attached that penetrate the ground. They will appear as the brush gets beaten back.
- Install the additional 20" x 12" drainpipe down range.
- Set up a temporary water supply system from the creek to Range 1. (light plumbing)

What to bring:

- Ear and eye protection, gloves, and any other protective clothing you need. There will be thorns....
- Weed whackers, especially ones with fancy thick brush blades.
- Hedge trimmers.
- Small chainsaws for thicker brush
- Shovels, and other digging tools for installing the drainpipe extension.

From 8:30am all ranges will be closed. The archery range will remain open. Range 8 (shotgun) will be closed for the Shotgun range workday. First thing in the morning we want to focus on trimming the brush from the top of the berms, and then work down. Once all the brush is cleared below the top of the berms, range 3,4,5, and 6 can be reopened. We hope to reopen them by noon. Range 2 will remain closed until the workday on Range 1 is completed.
